

Applicant: UBI-TEK CO., LTD.

FCC ID: VFS-UBI001

1. How does the device Operate?

Answer: Power is provided by DC 12V power source. Frequencies are selected by a FM Button (Please see the user manual) on the EUT which has three frequencies within the frequency range (88.2-88.6 MHz). The device is a device of Car Kit which includes FM Transmitter Portion and Bluetooth Receiver Portion (DOES NOT HAVE BLUETOOTH TRANSMITTER PORTION ON THE DEVICE).

2. Provide information on the device and its antenna.

Answer: The antenna is a built-in trace on the circuit board (Please see the user's manual and circuit).

3. How is it installed?

Answer: Plug-in connector is inserted into the DC12V power source. No other installation is required.

4. What test procedure was used?

Answer: ANSI C63.4-2003.

5. If tested in a car, how was it configured?

Answer: It was not tested in an automobile. It was tested in a 3 meter range as shown in the Test Set-Up photographs.

6. Was the tuning range properly verified? The test lab should indicate in the report that the tuning controls were manually adjusted to verify the maximum tuning range.

Answer: 88.2 MHz and 88.6 MHz are available; Please see the test report and manual.

7. Was the bandwidth properly tested with the maximum audio input? The test lab should describe the audio input signal (use a typical audio file from a typical device) - DO NOT use 1kHz tone from signal generator as specified under ETSI EN 301 357-1)

Answer: We played a song from iPod with the maximum audio input.

8. Does the device operate in a vehicle? Please state that this was verified.

Answer: It was not test in a vehicle.
